An Interactive Icebreaker Activity

# WELCOME, STUDENTS!

You've somehow found yourselves locked in the Principal's Office! Don't worry, it's all part of the game. To escape before the lunch bell rings, you'll need to use your knowledge, teamwork, and problem-solving skills. Throughout this room, you'll find puzzles, riddles, and questions related to school rules, subjects, and maybe even a few secrets. Each solved challenge will bring you closer to freedom. Are you ready to test your wits and escape the

Principal's Office? Let the games begin!

# RULES OF THE GAME

Divide students into teams of 4-6 students. This encourages collaboration and allows for diverse skill sets within each group.

Follow the slide instructions; each new slide reveals a clickable item, presented as a riddle, question, or puzzle.

Teams work together to solve the puzzle and find the next clue. Each solved puzzle leads to another clue, bringing them closer to the final escape.

The first team to solve all puzzles & find the final code "escapes" the Principal's Office.

CLUE

Congratulations, you've found the 'Lost and Found' bulletin!  
This is a crucial piece of the puzzle. To unlock the next step, you need to determine a numerical code based on the locations of these lost items.

CLICK HERE FOR HOW TO CALCULATE THE CODE:

LOST

AND

FOUND

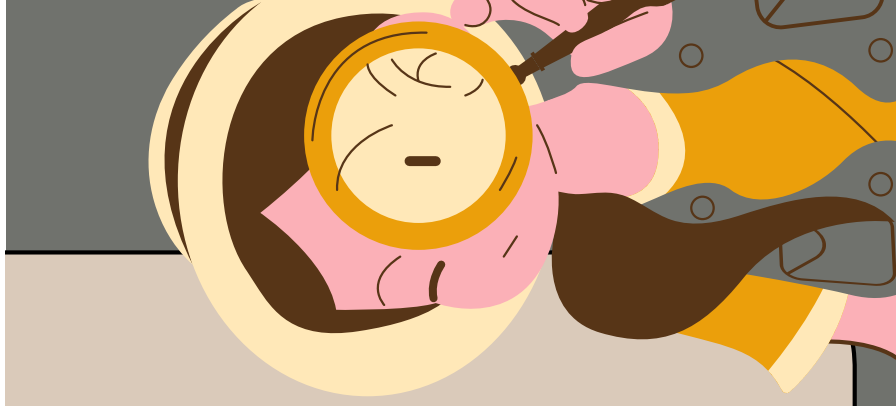

Basketball: found on the coach's desk.

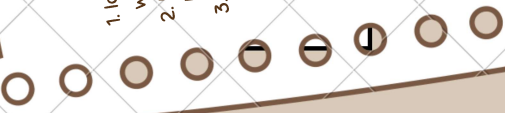

Gold locket: found on gym floor.

Silver Key: Found inside the trophy case.

Broken Whistle: Found near the scoreboard.

Single Earring: Found under the bleachers.

**HERE'S HOW TO CALCULATE THE CODE:**

1. Identify the specific location where each lost item was found.
2. For each location, take the first letter of that location's name.
3. Convert that letter into its numerical value based on its position in the alphabet (A=1, B=2, C=3, etc.). For example, if a location started with 'D', its value would be 4.
4. Sum all these numerical values together.
5. Finally, subtract one (1) from that total sum.

This final number is the next part of your code.  
Good luck!"

LOST

AND

FOUND

51-1=50

I have a face, but no eyes. I  
have hands, but no arms. I tell  
you when to start and when to  
stop. And in this office,  
my ticking might be your  
only hope.

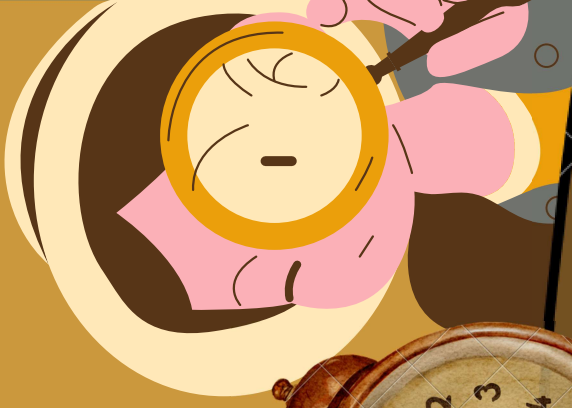

Find this item to get the final  
piece of the code.

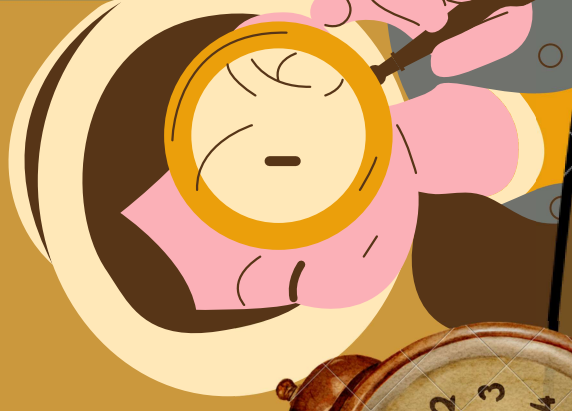

If this clock is set to local time  
in Miami, Florida, during daylight  
savings time. What time would  
it be in London, England?

WHEN YOU DECIPHER THE TIME, THE HOUR  
BECOMES THE FINAL PART OF THE CODE.

CLUE 1

First, we need to consider the time zones and DST rules for both locations. Miami observes Eastern Daylight Time (EDT) during DST, which is UTC-4. London observes British Summer Time (BST) during its summer months, which is UTC+1. It would be 3:24 PM in London, England, during its summer.
